Dear

Please find enclosed an information leaflet in respect of the Therapeutic Education Department.

Education is part of the package of care for all young people who are admitted to The St Aubyn Centre. We aim to provide a meaningful individual programme for each young person

As their health improves, young people may have the opportunity to take part in a variety of offsite activities including trampolining and cycling. Some of the activities fall into the category of adventure activities e.g. wall climbing and for these we will require parental consent. A consent form is attached to be signed and returned.

We would like to be able to contact you by email to enable us to send you progress reports. If you are agreeable to this, please complete your email address on the consent form and please email me if you have any queries or comments.

Yours sincerely

Gill Jackson
Head of Education
